

Director, Northern Processing Facility
SPECTRA ENERGY Transmission (SET-WEST), Fort Nelson, B.C.

THE COMPANY:

- One of North America's premier Natural Gas infrastructure companies connecting Natural Gas sources to premium markets across North America; key areas of expertise include:
 - BC Pipeline** – Spectra Energy's transportation system stretches from Fort Nelson, in northeast BC and Gordondale at the BC/AB border, to the southern-most point at the BC/US border at Huntington/Sumas;
 - BC Field Services** – Spectra Energy's integrated raw gas gathering and processing system gathers raw natural gas from diverse supply sources such as the Yukon and southern NWT, AB and northeast BC;
 - Midstream** – Spectra Energy Midstream is one of the largest independent midstream operators in the Western Canadian Sedimentary Basin. It has interests in 11 natural gas processing plants with a net processing capacity of 687 mmcf/d;
 - Natural Gas Liquids** – Spectra Energy's Empress System includes natural gas liquids (NGL) extraction, fractionation, transportation, storage and marketing operations.

THE ROLE:

- Reports to the General Manager, Field Services, SET-WEST, based in Fort St. John, B.C.;
- Direct subordinates include: an Operations Specialist, Projects; and the Manager, Operations;
- Indirect reports (through the Manager, Operations) include: 2 Operations Team Leaders, 2 Team Leaders and an Administrative Assistant, and approximately 25 operations personnel who are led in "non trades line" relationships under the Canadian Pipelines Association;
- Responsible for the overall management and coordination of the new Fort Nelson Northern Complex operations, currently scheduled for Start-Up December 2012;
- Working independently, will provide proactive leadership and direction to all staff engaged in field operations and support services associated with operations, including heavy involvement in the Commissioning, Start-Up and Staffing of the new facilities.

Specific Responsibilities for the Northern Complex area of operations:

- Ensure that Production, Reliability, Safety and Environmental targets are achieved;
- Manage Capital and Operations & Maintenance budgets;
- Manage hiring, discipline, leave of absence, disability management, and employee orientation;
- Manage Stakeholder relations;
- Manage employee performance and plan career development needs with employees;
- Provide direction to Operations Management System Programs; ensure components are current, relevant and aligned;
- Provide input and expertise in the development and maintenance of program deliverables;
- Manage Risk(s) effectively.

THE CANDIDATE:

- P.Eng.; or Diploma in Technology; or 1st or 2nd Class Power Engineering Certificate of Competency;
- 10+ years of relevant experience in continuous process manufacturing environments, with proven supervisory, leadership and budgetary management responsibilities;
- Previous plant Commissioning/Start-Up experience is a high want and definite advantage;
- Industry experience in Natural Gas processing facilities or other large process industry facilities is a definite asset;
- An experienced leader and effective communicator, skilled in high performance team(s) management, negotiation and conflict resolution;
- Proven ability to work effectively across the entire organization with Operations, Maintenance, Engineering and Staff personnel in a dynamic, Start-Up environment;
- Skilled in working with computerized management systems such as SAP; competency in Excel and Word programs;
- Practical experience in developing, refining and implementing operational performance improvements;
- Experience in the recruitment, selection, retention, development, and mentorship of subordinates.

COMPENSATION:

- Attractive six figure Base Salary, eligible for annual Performance Incentive Plan, Long Term Incentive Plan, Housing Assistance, Vehicle, Power Engineer License Allowance, if applicable;
- Comprehensive and industry competitive Flexible Benefits package, including Pension, Savings Plan, Northern Living Allowance and full Relocation provisions, etc.;
- Solid career options potential and support for ongoing professional development.
