

New Proxy Membership Program

To all Power Engineers

Gentlemen

The IPE historically has been the dominant voice to speak on behalf of Power Engineers. The TSSA has frequently commented on the small amount of Power Engineers we represent. This makes it very difficult for us to lobby anyone because we are in fact representing a small percentage of ticket holders.

To more effectively represent Power Engineers we are developing a new category of members called “**Proxy members**”. This free membership would allow us to speak on your behalf to TSSA, Governments, etc... regarding Power Engineering issues.

This would strengthen your voice over issues that are directly affecting you.

The “Proxy member” would not have the same privileges of a regular member, but would be kept informed (E-mailed) with specific contents relating to IPE issues.

I would appreciate your support by filling out the attached proxy.

If you have any questions, please do not hesitate to contact me.

Mario Desjardins
Windsor IPE, president
