

Title	Author
industrial waste treatment volume 1	cal state
operation of wastewater treatment plants volume 1	cal state
energy management	donald l robbins
building design and maintenance	donald l robbins
supervision	donald l robbins
a beginners book on power plant operation	department of labour
stationary engineering	coles
fundamentals of gas utilization second edition	john dutton
modern refrigeration and air conditioning	althouse/turnquist/bracciano
refrigeration and ice making second edition	orfa
ammonia refrigeration training manual level 1	
ammonia refrigeration training manual level 2 and 3	
SAIT notes	
refrigeration operator "A" class	
building systems technician -1 introduction	
building systems technician -2 heating	
building systems technician-3 refrigeration	
building systems technician -4 air conditioning	
industrial motor control	stephen l herman/ walter n alerich
discovering physical science	william a andrews/tj elgin wolfe/donna moore
fundamentals of physics :a senior course	martindale/heath/eastman
cameron hydraulic data	ingersoll-rand
industrial refrigeration	w f stoecker
industrial instrumentation fundamental	austin e fribance
steam plant operations 5th edition	woodruff/ lammers
electric circuits and machines sixth edition	lister
betz handbook of industrial water conditioning	betz
fundamentals of engineering drawing fifth edition	luzadder
intermediate technical mathematics	heywood
cfc/hcfc/hfc control in refrigeration and air conditioning industry	
mathematics for the heating, ventilating, and cooling trades	goetsch/ goetsch/ rickman
college physics 8th edition	frederick j bueche
essential mathematics part 2	rudolf a zimmer
basic technical mathematics with calculus	allyn j washington

SAIT notes 1 THROUGH 4TH
